

GANTUG BATGEREL

FULL STACK DEVELOPER (FRONT-END HEAVY)

Ulaanbaatar, Mongolia | gantug@protonmail.com | www.gantug.com

SUMMARY

Hi, I'm Gantug Batgerel — a Full Stack Developer with a strong focus on front-end development. I enjoy designing and building solutions with a personal touch, driven by creativity and curiosity. Currently, I lead SEO initiatives for the Gobi Cashmere eCommerce platform, blending technical expertise with strategic thinking. Passionate about exploring new technologies, I thrive on learning, analyzing, and pushing boundaries — whether it's through coding, reading, or play.

PROFESSIONAL EXPERIENCE

Back-end developer @ GOBI CASHMERE

April 2023 – Currently

- Led the **technical implementation of Next.js with TypeScript and Sanity CMS**, migrating from the legacy system to a more modern, scalable architecture.
- Successfully **migrated the website from the Page Router to the App Router**, improving code structure, performance, and development scalability.
- Refactored major components such as the **collection pages, static content pages, and SEO architecture**, resulting in:
 - **Lighthouse SEO and Best Practices scores of 100,**
 - **Accessibility improvements,** and
 - **Performance scores consistently above 80.**
- Spearheaded the **technical SEO efforts**, identifying and resolving over **1,000+ SEMrush-detected SEO errors and warnings** within two weeks, significantly improving the site's health and search visibility.
- Acted as the **primary point of contact with the NDPI agency**, representing the web development team to align on goals, updates, and implementation strategies.

Front-end developer @ erxes Inc

April 2021 – March 2023

- Started as a front-end development intern and was promoted to Junior Developer based on performance and contributions.
- Worked on enterprise-level projects including APU, MCS, and TESO, contributing to feature development, UI improvements, and maintenance.
- Responsible for updating website designs and implementing necessary codebase enhancements to ensure design consistency, usability, and performance.
- Collaborated closely with cross-functional teams to deliver responsive, scalable front-end solutions tailored to client needs.
